QA ENGINEER

GSL Group includes a wide range of businesses including Real Estate Development, Holdings and Construction (Commercial, Industrial, Residential and Sports & Entertainment Facilities), E-Commerce, Sports and Entertainment, Travel & Hospitality, Food & Beverage, and Agriculture. With wide range of portfolio, we are looking at different ways to disrupt and add value to traditional industries. Whether we are creating new products or expanding on our existing product, people at GSL are always up for a challenge. We work together as a team to help and connect the community and bring a positive experience to them.

Our Vancouver team is seeking a QA Engineer to join our team. We are looking for candidates who can thrive in a fast-paced and autonomous work environment. This person will work with multiple products: OfficePools and WiseVenue.

RESPONSIBILITIES

This multi-faceted role will have a number of accountabilities, including but not exclusive to those listed below:

- Work on building a quality driven engineering culture that helps ship products with good confidence
- Working alongside Product Managers, Developers, and Designers to create an optimal user experience
- Working effectively in an entrepreneurial/startup environment that is fast paced
- Assess risks to ship features with a high quality standard
- Work cross-platform engineering challenges and contribute creative ideas and improve quality
- Implement and evolve QA processes to ensure test and scale testing efforts across multiple products
- Define Quality metrics and implement measurements to determine effectiveness and measure overall quality

REQUIREMENTS:

- B.Sc in Computer Science or related field
- 2+ years of Quality assurance and test engineering experience.
- Experience in Python, Node, HTML
- Experience in testing and debugging web/mobile applications
- Experience with Angular and ReactNative is a plus
- Team player, with strong collaboration skills
- Experience with test planning, test designing and execution, performance and stress testing, implementing and maintaining quality test automation is a plus

- Experience working with small to medium engineering teams
- Experience with manual and automated unit, integration and end-to-end tests

COMPETENCIES:

- Possesses strong interpersonal and communication skills
- Lifelong learner motivated to continue to learn and develop
- Highly innovative and enjoys exploring new solutions and technologies
- Critical thinking and problem-solving skills

Compensation: will be commensurate with experience.

Job Location: Vancouver
